This page lists publications on which I have contributed as a co-author, spanning clinical machine learning, biomedical informatics, NGS/bioinformatics workflows, and healthcare data analytics. My contributions across these collaborative projects primarily involved data cleaning and preprocessing, statistical analysis, result validation, and manuscript preparation, alongside independent modeling work on my master's thesis at Northwestern. Full author lists and venues are listed below; DOIs and IEEE Xplore links are included where available.

SPAN

Peer-Reviewed Publications (journal articles and conference papers)

In computer science and bioinformatics, conference papers (e.g., IEEE BIBM) undergo full peer review and are often more selective than journal submissions.

2025

The Quality and Reliability of Short Videos About External Counterpulsation on TikTok: A Cross-Sectional Study

Zheng, J., **Li, D.**, Borchert, G. M., et al., & Huang, J.

Proc. IEEE International Conference on Bioinformatics and Biomedicine (BIBM 2025)
